

## GETTING STARTED

### Installation

After running the installer the **QuickPDFAX0721.dll** file will be placed into the ActiveX folder, inside the main installation folder you chose during installation.

The default installation folder is **C:\Program Files\Quick PDF Library\ActiveX\**

### Registering the ActiveX DLL

Use the **regsvr32** command to register Quick PDF Library ActiveX Edition. On XP, click **Start | Run** and enter the command:

```
regsvr32 "C:\Program Files\Quick PDF Library\ActiveX\QuickPDFAX0721.dll"
```

Replace the path in the above command with the folder you chose during installation.

On Vista you need to open a command prompt with administrator privileges in order to run the command.

### Class name

The class name of this release of Quick PDF Library ActiveX Edition is:

**QuickPDFAX0721.PDFLibrary**

### Instantiating the class

Use the **CreateObject** or equivalent function in your development environment to create the QuickPDFLibrary object.

The first function you should call is the **UnlockKey** function, passing it your license key.

Here is a Visual Basic example:

```
Private Sub CommandButton1_Click()  
    Dim PDFLibrary As QuickPDFAX0721.PDFLibrary  
    Set PDFLibrary = CreateObject("QuickPDFAX0721.PDFLibrary")  
    If PDFLibrary.UnlockKey("your license key here") = 1 Then  
        Call PDFLibrary.DrawText(100, 500, "Hello from Visual Basic")  
        Call PDFLibrary.SaveToFile("C:\Docs\HelloFromVB.pdf")  
    End If  
    Set PDFLibrary = Nothing  
End Sub
```
